TECHNICAL FEATURES AND SPECIFICATIONS

MiniCompact is a unique green energy charging station for outdoor promotional/educational events. Powered by solar and kinetic energy, MiniCompact is a lighter version suitable for consumer engaging activities through free charging of smart devices, Wi-Fi, LED lighting and brand promotion at smaller events. Each unit is a focal point for bringing your brand closer to your clients. Low weight and miniature design enable easy deployment of MiniCompact at any location of interest.

Technical Specifications

- 5 pre-installed chargers for all types of smartphones and portable devices
- 1 Wireless charging pad
- Powered by solar panel (up to 75 W) and kinetic energy tiles (power rating: 5 Watts continuous power from footsteps)
- 15 W LED light
- Kinetic tiles harvest energy from footsteps providing an excellent opportunity to interact with customers and visitors
- Suitable for external and internal use*
- Easy to transport and install at any location of interest

Branding

- Interactive Point of Sale for brand promotion and customer engagement (charging of smart devices and kinetic energy generation)
- Perfect for festivals, sporting events, concerts and promotional activities
- Different branding options of the product advertising space
- The basic version comes without kinetic tiles, optionally one or more per customer request
- Features: Custom colors, Wi-Fi router, SOS button, LED lighting in Brand colors, RGB light
- Directly purchase or rent MiniCompact at certain fee per week

*Technical adjustment for indoor: back-up power supply 220 V / 110 V
